Engineering beyond the screen.

Senior Mobile Software Engineer specializing in native iOS development, with experience taking products from architecture and implementation through QA and production delivery.

01

Mobile Architecture

Maintainable modular systems, clear boundaries and pragmatic patterns.

02

Technical Leadership

Architecture decisions, code reviews, mentoring and delivery standards.

03

Engineering Excellence

CI/CD, observability, testing, reliability and defect prevention.

04

Product Engineering

Turning business requirements into production-ready mobile experiences.

SELECTED EXPERIENCE

Applaudo Studios

Mobile Software Engineer / Technical Lead - 2020 to 2025

MultiMoney

Mobile Software Engineer - 2025 to 2026

Production mobile products.

01

MultiMoney

DIGITAL BANKING PLATFORM

Feature delivery and architectural modernization for a native digital banking app, including financial workflows, onboarding and modularization.
